The image shows two large, white, cylindrical industrial storage tanks in a factory or warehouse environment. The tanks are supported by metal stands. The background features a ceiling with skylights and structural beams. The text 'AUTOMOTIVE LIQUIDS' is overlaid in a bold, white, sans-serif font with a red outline. A small white label with the number '2' and the word 'PORCELAIN' is visible on the left tank.

No. 101 Car Wash Detergent is specially formulated for automatic brush type systems. It is a concentrated liquid that may be diluted or pumped directly to the metering valves. A high foaming product, No. 101 is unsurpassed in quality and performance. It provides lubrication to the brushes to prevent brush wear and the scratching of paint.

WAX

Chem Clean produces high quality spray wax for use in self-serve or full-serve car washes. It provides excellent beading of water and imparts a shine to the car surface. Our wax product's bright scent fills the bay, pleasantly reminding customers they are applying wax.

CHEMICAL CLEANERS FOR EVERY JOB!

That's what it used to say on every product we made. Over our 50 year history we've formulated, tweaked, and compounded whatever the market has needed. But business changes as our customers do. So while we still have all the formulas ready to roll out into production, we only do this on request.

Here's a sampling of some of the products we'd love to bring back:

Windshield Cleaner

WaterFree Shine

Leather Conditioner

If you can't find a product you need for your business, we can always try a formulation with your very own custom label. We do everything in house, which means no additional R&D fees, and a manageable timeline. After all when a new opportunity arises, we want to help make it happen.

AUTOMOTIVE POWDERS

Available in 50 Pound Boxes

Product # 2-2-2

Mean Green is a powdered presoak to be used before the normal wash cycle in both self-service and full-service car washes. When sprayed on the car before washing, this product can help soften and remove bugs, road film, grease, and dirt. Cars get cleaner faster, and with less effort.

An unusual powder formulation designed for a customer with an eye on the bottom line. Powder products continue to demonstrate superior cost effectiveness in car wash applications.

Product # 2-1-3

Car Wash #106 is a fast acting car wash detergent with extra film removers and water conditioners added. It is non-corrosive to equipment, fast, and easy to dissolve.

#106 has been compounded with an extra quantity of wetting and foaming agents that not only increase cleaning but pleases the customer. These components are essential to a superior clean, and are found in the most effective and expensive detergents.

Car Wash #100, Pink Hi-Foam and **Blue Hi-Foam** are fast acting car wash detergents with extra film removers and water conditioners added.

These components are essential to superior cleaning and are found in the most effective and expensive detergents. In addition, these Hi-Foams have been compounded with an extra quantity of wetting and foaming agents that not only increase cleaning, but please the customer.

Product # 2-1-7

Lazer Citrus is a unique formula designed for use in touchless automatics that will perform well in most car washing applications.

It is an amazing product as a bay soap or presoak in self-serve applications and has a high proportion of surfactants. It can be mixed into a highly concentrated solution and is *specifically designed for a one to one mixing ratio*, unlike every other formulation we compound.

Premium Gold is the foamiest and most aggressive cleaner in our product line. It's a fast acting car wash detergent with extra film removers and added water conditioners.

Available in 50 Pound Boxes

Product # 2-2-1

Powder Foam Tire is a fast foaming tire in ultra concentrated powder form. This product has a very high proportion of surfactants and can be mixed into a highly concentrated solution. Bright yellow-green foam provides high performance cleaning for a profitable customer-pleasing foam tire.

Product # 2-2-2A

Super Wheel Wash is designed for use in automatic or self-serve car washes. It gives super white tires and is economical to use in automatic dispensing equipment. Super Wheel Wash is dyed fluorescent green so it can be readily seen as it is dispensed from the nozzle. This top-tier product is a must have for any competitive car wash owner.
